CAS. The multi-brand battery system.

More than 40 powerful manufacturers have joined forces so that tools, battery packs, and chargers are 100% compatible with each other. CAS battery packs are developed in Germany and perform well even in the most demanding applications thanks to leading battery pack technology.

One battery pack, many advantages.

- Buy less battery packs
- Environmentally-friendly
- Save money

Any brand you trust. All with just one CAS battery pack.

Many brands and trades, one battery pack.
With CAS you master all working steps.

Metal processing

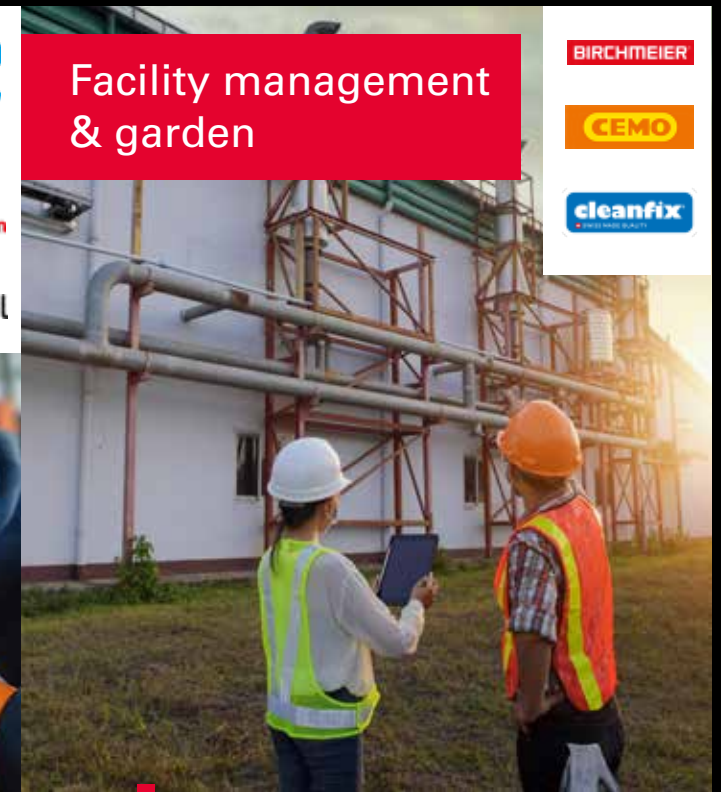

- GESIPA

Use many advantages? All with just one CAS battery pack.

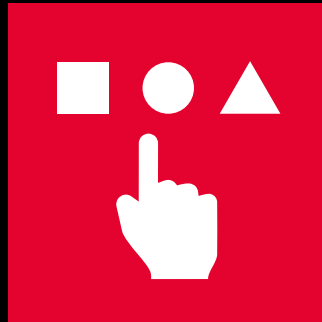

Step into a cordless world where comfort, performance, and efficiency converge. With CAS, you're not just purchasing a battery pack system, but investing in a versatile ecosystem that adapts to your varying professional needs- from everyday tasks to the most demanding jobs.

Use the largest cross-manufacturer battery pack system

Experience 100% compatibility

Discover the greatest variety of tools

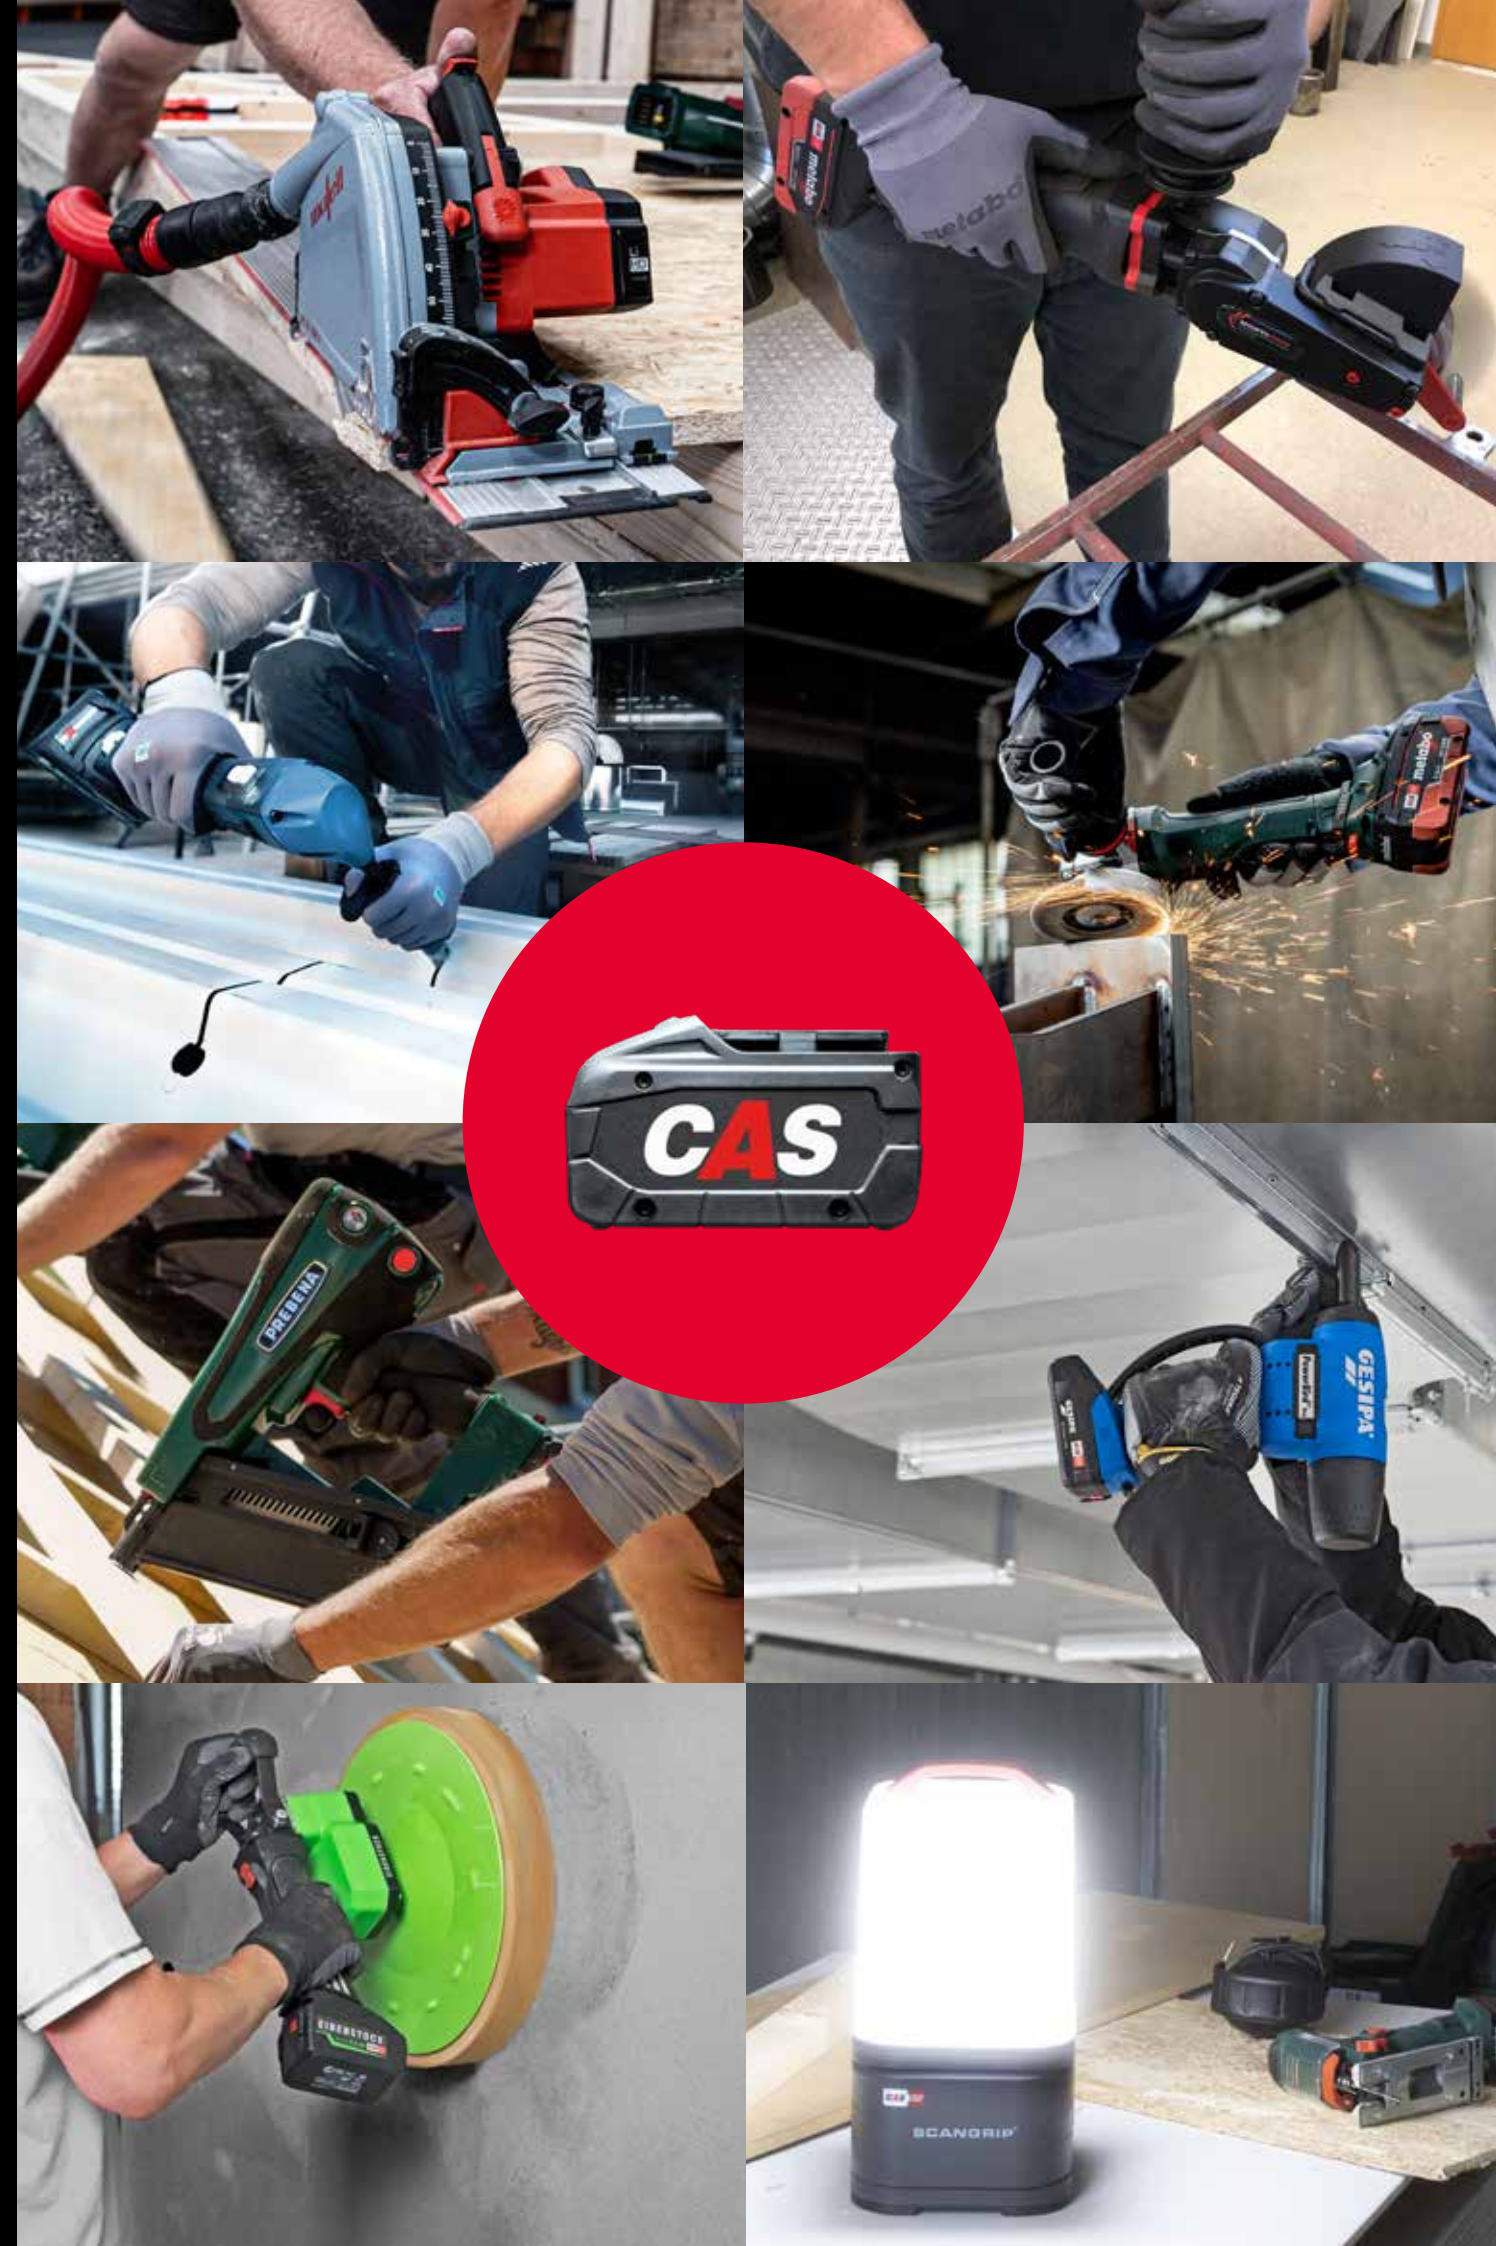

Save resources

Save money

Save time

100% leading battery pack technology! All with just one CAS battery pack.

CAS leverages the benefits of the world's leading wireless system in the industry – an innovation by Metabo. With over 40 years of experience in battery pack development, Metabo is the pioneer in introducing new battery technologies and the concept of the 'cordless construction site'

1 More power

with new LiHD cell technology in combination with a newly developed battery pack.

- Enlarged power rails and contacts capable of handling high currents
- 3x better conductivity with cell connectors made of a specialized copper alloy

2 More runtime

- More active material in the new cells 21700
- Use of high quality materials (silver and copper)

3 Longer service life

- Extreme ruggedness
- Optimal protection against internal contamination with fully encapsulated cast design and full protective coating of electronics, as well as optimal gasket in the cover structure.
- Protection of the cells with rubber pads
- Less frequent charging due to more usable cell energy
- Exterior rubber coating on the battery pack provides a secure and non-slip grip and also serves as shock protection

Since 2009 battery packs of any generation are 100% compatible with each other - with all machines and chargers of their volt class. This is true today and will be true also tomorrow.

40 years of
battery pack
experience

15 million
battery packs
