

ZOOM

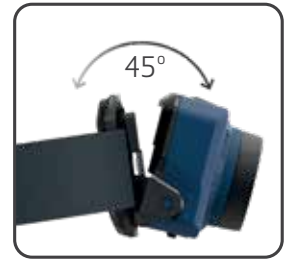

Rechargeable headlamp with 3-step function

Everybody needs a good, hands-free headlamp to carry out his work in places with insufficient illumination. That is the reason why we expand our range of headlamps for professionals with another rechargeable headlamp. Both design, functionality, and price are very attractive for this new member of the SCANGRIP headlamp family.

It has got its name "ZOOM" because the beam angle can be "zoomed" in and out according to the nature of the job to be done. Thus, the beam angle can be adjusted from 10° providing a very long beam distance of 80 m to a much wider beam angle of 70° providing a shorter beam distance of 30 m.

The new ZOOM is very powerful and provides as much as 220 lumen. It has a new "3-STEP FUNCTION" which makes it possible to adjust the light output depending on the actual need for light. The setting can be made in STEP 1 = 10 lumen, STEP 2 = 80 lumen, and STEP 3 = 220 lumen. Step 1 is called "READING MODE-setting" as 10 lumen provides just enough light to read an operating instruction for instance.

ZOOM has a modern, streamlined, and compact design with a remarkably low weight, only a little above 100 g which means that you hardly notice you wear it. The 30 mm headband is soft and durable and easy to adjust in the requested length. The lamp head is flexible and can be adjusted 45° to get the best possible lighting angle during work.
