

SCANGRIP POWER BANK

4000 mAh aluminium power bank with battery indicator

ORIGINAL
SCANGRIP

Taking advantage of the newest battery technology, the compact and high-quality power bank is designed for the SCANGRIP I-VIEW and I-MATCH headlamps.

Compared to the previous version, this power bank comes with a USB-C cable and clips to secure the cable on the headband. It is designed with a battery and charging indicator. It also features an intelligent load detection which means it automatically turns power on/off when load is connected/removed.

The modern and lightweight design makes the power bank easy and convenient to take with you everywhere you go. The housing is made of anodised aluminium for high durability which means it can withstand the demanding work environment of the workshop, van or building site.

To extend the operating time of the I-VIEW and I-MATCH headlamps, attach the power bank to the clip holder on the headband, secure the cable with the clips, and connect it to the headlamp.

In addition, the power bank can be used for recharging SCANGRIP work lights as well as other devices.
